ACCESSORY SERIES

ACOUSTIC/BANJO ADAPTOR LOOP transforms most guitar straps into an acoustic/banjo strap!

NEOTECH's new **ACOUSTIC/BANJO ADAPTOR LOOP** is a quick and easy way to transform most guitar strap connections into a loop attachment system. The loop attachment is ideal for the neck of an acoustic or the bracket of a banjo. The soft, durable tubular nylon webbing of the adaptor is easily attached to your instrument by wrapping it around the guitar neck or banjo bracket and looping it through itself. This leaves the leather base piece available to connect into a regular guitar attachment. The solid leather retaining base assures a secure hold that's easy to attach and compact in design. Finally, the acoustic and banjo player have the freedom to choose from any strap as converting it to their needs is a snap. With the **ACOUSTIC/BANJO ADAPTOR LOOP** all you need to do is *adapt and attach!*
